

Retail Therapy Television Training

Retail Therapy Television offer a number of broadcast training courses including bespoke presenter and media training courses.

For those looking at a career in television, Retail Therapy Television's training courses are ideal. The courses are designed to allow you to grasp the basics of television presentation, production and the techniques required in today's modern broadcast environment.

We have courses that cover, the use of autocue, multi camera studio, DRtv, Shopping Television, Talk Show and a lot more.

The participants also get the opportunity to get to grips with some of the technology and techniques required in today's modern broadcast environment.

Retail Therapy Television Location

We are located not far from the M3 and the M25. Heathrow Airport is a short taxi drive away.

Local train stations are Shepperton, Sunbury or Ashford (Middlesex) on the London Waterloo line. There's ample parking and you don't need to navigate the congestion charge.

The studios are on the first floor, but don't worry, we have a huge lift that can accommodate a forklift!

And we're not far from the world famous Shepperton Studios.

Retail Therapy Television Production

Broadcast Production
Retail Therapy Television can offer a complete turnkey solution for the programme maker. We can make small budgets go further giving you the opportunity to maximise the impact of your production.

Corporate Production
The corporate television market is becoming more and more important and competitive. We can offer a quick and effective way to market your product or brand.

Regardless of your market sector, telling means selling.

IPTV

You can now join the thrust of the next generation of content delivery. IPTV gives the broadcaster the opportunity to direct market, promote and interact with their viewers.

Retail Therapy Television can produce content both pre-recorded or live for broadband delivered services.

Solutions

In an ever-changing market-place, we strive to remain on top of increasing demands for the latest, cutting-edge technology. However, we understand that budgets too are important. That's why we offer total flexibility in our approach.
